

User's Manual

HDR-4100C/HDR-4000C

Notice

Thank you for purchasing a HUMAX product. Please read this user's manual carefully to be able to safely install, use and maintain the product at maximum performance. Keep this user's manual next to your product for future reference. The information in this user's manual is subject to change without notice.

Copyright (Copyright © 2016 HUMAX Corporation)

Not to be copied, used or translated in part or whole without HUMAX's prior consent in writing except approval of ownership of copyright and copyright law.

Meaning of Symbols

	To reduce the risk of electric shock, do not remove cover (or back). No user serviceable parts inside. Refer servicing to qualified service personnel.
	This symbol indicates dangerous voltage inside the product that presents a risk of electric shock or personal injury.
	This symbol indicates important instructions accompanying the product.

Warnings, Cautions and Notes

Throughout the whole manual, pay special attention to the following marks that indicate hazardous situations.

Warning

Indicates a hazardous situation which could result in serious injury

Caution

Indicates a situation which could damage the equipment or other apparatus

Note

Indicates additional information to make the user aware of possible problems and information of any importance to help understand, use and maintain the installation.

Warranty

The warranty does not cover parts which may become defective due to misuse of the information contained in this manual.

'WEEE' Instructions

This product should not be disposed with other household waste at the end of its working life. Please separate this from other types of waste and recycle it responsibly to promote the sustainable reuse of material resources. This will prevent possible harm to the environment or human health from uncontrolled waste disposal.

Domestic users:

Please contact either the retailer where you purchased this product or their local government office for details of where and how they can take this item for environmentally safe recycling.

Business users:

Contact your supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial waste for disposal.

Trademarks

- Manufactured under license from Dolby Laboratories. Dolby, Dolby Audio, Pro Logic, and the double-D symbol are trademarks of Dolby Laboratories.
- HDMI, the HDMI Logo, and High-Definition Multimedia interface are trademarks and registered trademarks of HDMI Licensing LLC.

HDMI™

This item incorporates copy protection technology that is protected by U.S. patents and other intellectual property rights of Rovi Corporation. Reverse engineering and disassembly are prohibited.

Notice

EU regulatory conformance

Hereby, HUMAX Co., Ltd, declares that this HDR-4000C/E and HDR-4100C/E are in compliance with the related Directives

The full text of the EU declaration of conformity is available at the following internet address:

For Your Safety

Safety Instructions

1. POWER SUPPLY

- Operate this product only from the type of power supply shown on the marking label. If you do not know the type of power supplied to your home, contact your local power company.
- Disconnect the power supply before you start any maintenance or installation procedures.

2. OVERLOADING

- Make sure that the wall outlet, extension cord and adapter have a sufficient power rating for the appliance. If not, this can cause an electric fire shock.

3. LIQUID

- Do not expose this product to liquids. Do not put objects filled with liquid on the product.

4. CLEANING

- Disconnect the product from the wall outlet before you clean it.
- Use a moist cloth to clean the product. Do not use solvents. Wipe the surface gently with a soft cloth as it may get scratched.

5. VENTILATION

- Make sure that the slots on top of the product are not blocked. It is necessary to have a sufficient airflow into the unit.
- Do not put electronic equipment on the product.
- Do not put objects on the product. This will block the ventilation or cause damage to the surface.

6. ATTACHMENTS

- Do not use any unsupported attachments as these may be hazardous or cause damage to the product.

7. LIGHTNING, STORM OR NOT IN USE

- Unplug the product from the wall outlet and disconnect the antenna during a thunderstorm or when left unattended and unused for long periods of time. This will prevent damage to the unit due to lightning and power-surges.

8. EXTRANEIOUS OBJECTS

- Do not insert anything through the openings in the unit, where they can touch dangerous voltage points or damage parts.

9. REPLACEMENT OF PARTS

- When replacement of parts is required, be sure the service technician uses replacement parts specified by the manufacturer or those that have the same characteristics as the original part. Unauthorised substitution may result in additional damage to the unit.

10. CONNECTION TO THE CABLE TV SIGNAL

- Disconnect the power supply before you connect or disconnect the cable from the cable TV signal. If not, this can cause damage to the cable TV line.

11. CONNECTION TO THE TV

- Disconnect the power supply before you connect or disconnect the cable from the TV. If not, this can cause damage to the TV.

12. LOCATION

- Place the product indoors to avoid exposure to lightning, rain or sun. Do not place it near a radiator or heat register.
- Keep at least 10 cm clearance from any other appliances susceptible to electromagnetic influences such as a TV or a VCR.
- If you place the product on a rack or a bookcase, make sure that there is adequate ventilation and that you have followed the manufacturer's instructions for mounting.
- Do not place the product on an unstable surface where it can fall. A falling product can cause serious injury to a personnel and serious damage to the appliance.

13. Environment

- Attention should be drawn to the environmental aspects of battery disposal.
- Care is required for the use of this apparatus in tropical and/or moderate climates.

Cautions and Warnings

1. To avoid damage of the power cord or plug

- Do not modify or process the power cord or plug arbitrarily.
- Do not bend or twist the power cord.
- Make sure to disconnect the power cord while you hold the plug.
- Keep heating appliances as far as possible from the power cord to prevent the cover vinyl from melting.
- The mains plug, as a disconnection device, shall remain readily accessible by the user.
- All-pole main switch shall remain readily operable. (For products with power switch)

2. To avoid electrical shock

- Do not open the main body.
- Do not insert metal or inflammable objects inside the product.
- Do not touch the power plug with wet hands.
- Disconnect the power cord in case of lightning.
- Unplug the power cable before you install the antenna cable.

3. To avoid damage of product

- Do not use the product when it is out of order. If you continue to use the product when defective, this may cause serious damage. Make sure to contact the customer service centre if the product is out of order.
- Do not insert metal or alien substance into the slots for the modules or Smartcards. It may cause damage to the product and reduce its life span.
- Do not overly pile objects on the product. It may cause cracks, deformation and discoloration.

Quick Start Guide

HDMI Cable

Antenna Cable

LAN Cable

Note: Accessories may vary according to area.

Front & Rear

- 1 KABEL-EINGANG: Connect an antenna cable to the cable network.
- 2 KABEL-AUSGANG: Connect to the TV or VCR using an antenna cable.
- 3 VIDEO/AUDIO: Use an RCA cable to connect to the TV.
- 4 TV SCART: Connect to the TV using a SCART cable.
- 5 VCR SCART: Connect to the VCR or DVD using a SCART cable.
- 6 DIGITAL AUDIO: Connect to the audio system using an S/PDIF cable.
- 7 HDMI: Connect to the TV using an HDMI cable.
- 8 NETZWERK: Connect a LAN cable.
- 9 USB: Connect a Wi-Fi Stick.
- 10 SWITCH: Power on/off.

Note: The image may differ from the actual product.

Inserting the Smartcard

1. Open the right-hand flap on the front panel to expose the card slot.
2. Hold smartcard horizontally with the electronic chip facing downwards.
3. Insert the smartcard into the slot.

Connections

This section describes how to connect your product to match your particular devices and to gain optimum signal quality.

Warning: Connect all devices before you plug any power cords into the wall outlet. Always turn off the product, TV and other devices before you connect or disconnect any cables.

Note:

- If you encounter any problems setting up your product, please contact your local retailer or HUMAX Customer Service.
- Connecting your TV directly to the audio/video output of the product will assure a more vivid picture and enhance your viewing enjoyment.

Connecting the Cable TV Line

Connect an antenna cable from your cable TV network to **KABEL-EINGANG** connector.

Connecting the TV

1 TV with the HDMI connector

For the best picture quality, connect the product and TV using an HDMI cable.

2 TV with the SCART connector

For good picture quality, connect the product and TV using a SCART cable.

3 VCR with the SCART connector

To record an event with your VCR, connect the product and VCR using a SCART cable.

Note:

- When using the digital audio system, connect the product and the digital audio system using an S/PDIF cable for audio.
- Programs restricted by DRM (Digital Rights Management) may not be viewed via the HDMI cable. Connect using a SCART or composite cable.

Connecting the Network

4 Connecting to the Wi-Fi (Wireless LAN)

You can connect the network via the Wi-Fi access point.

1. Connect the Vodafone Kabel Deutschland Wi-Fi Stick to the USB port.
2. To configure the wireless network, go to the **Menü > Settings > Internet setup**.

Note: Make sure the distance between the Wi-Fi access point and the product is not too great. This may lower the quality of service.

5 Connecting to the LAN

Connect one end of the LAN cable to the product and the other end to the LAN router.

Remote Control

	STANDBY	Switches between operation and standby modes.
	TV	Controls TV.
	Exit	Exits all On-Screen Display (OSD) screens.
	TV/Radio	Switches between TV and radio modes.
	Menü	Displays the main menu.
	Programm	Displays the program guide.
	Aufnahmen	Displays the recording list.
	Select Video	Enters VOD service.
	Suche	Finds programs by genre or keyword.
	▲ +/-	Adjusts the audio volume.
	ARROW	Moves the cursor up, down, left or right.
	OK	Selects a menu or confirms a selection.
	P +/-	Changes the channel or page.
	MUTE	Mutes audio.
	Zurück	Returns to the previous channel. Goes back to the previous screen.
	Playback Control	◀◀ Rewind, ▶▶ Pause/ Play, ▶▶ Fast Forward, Rec Record, ■ Stop
		Colour keys for interactive applications.
	Opt	Displays the Audio/ Subtitle Language and Video Subchannel.
	NUMERIC	0-9
	Teletext	Enters the digital text service.

Inserting Batteries

Insert the batteries matching the plus(+) and minus(-) at each end.

Wizard

The installation wizard operates automatically when you power on the product for the first time or do a factory reset in the menu.

Note: If you exit the installation wizard without fully completing the channel searching procedure, you may not have all of the channels available.

1. Language selection

Select a language.

2. Channel scan

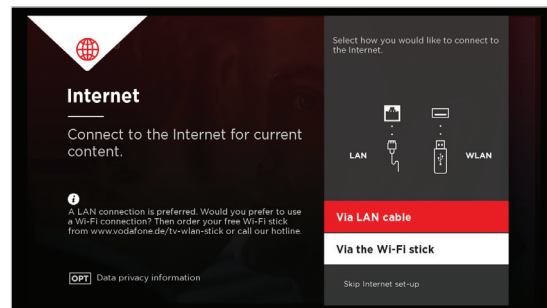

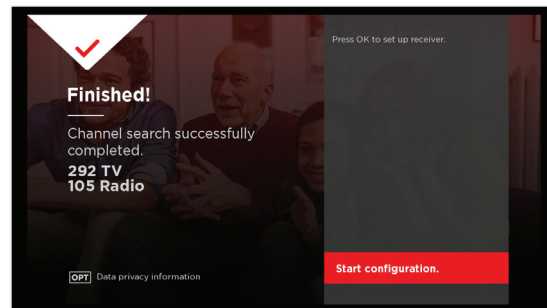

The HD-Video-Recorder automatically searches for TV and radio channels and stores them in places 101 to 999. After the completion of the channel search, the total number of TV and radio channels is displayed in the installation screen.

3. Internet connection

If you are connected to the Internet you can use Vodafone Kabel Deutschland's online video store "Vodafone Select". This service is not yet available everywhere in Germany. To connect the receiver to the internet, follow the instructions on the TV screen.

- **LAN:** Internet connection is automatically set up if your HD-Video-Recorder is connected via LAN cable.
- **Wi-Fi Connection:** If a Wi-Fi stick is detected a wireless connection will be set up automatically after the user has entered the according Wi-Fi security key.

Note: When both a Wi-Fi stick and a LAN cable are connected, the Internet connection is set up via LAN.

4. Energy mode

You can decide whether

- Your receiver consumes less energy overall, but starts slowly, or
- Your receiver starts rapidly but has a higher overall energy consumption.
- **Standard:** The default mode is called 'Standard' and has the lowest energy consumption but the longest start-up phase.
- **Active (scheduled):** You can select the times at which the device remains in Active mode and when it falls into the Standard mode.
- **Active:** The Active mode has the highest power consumption and keeps the HD-Video-Recorder ready at any time.

5. Change PIN

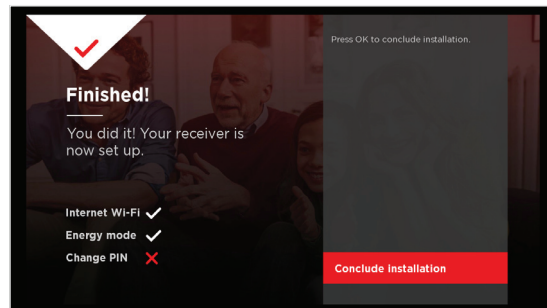

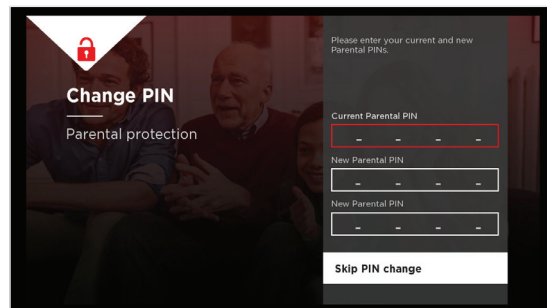

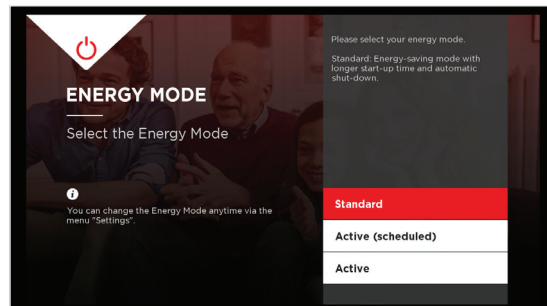

To protect your child from adult content you can change the parental PIN at any time. You can find the FSK 16 PIN in the letter your Smartcard came with.

6. Summary

At the end of the installation process you receive a summary of the changes you have conducted.

Subsequently you will be asked to give your consent to start with the Menu instead of Live TV and receiving messages provided by Vodafone Kabel Deutschland.

Afterwards a tutorial is started that describes the basic alterations that came with the Software Update.

Home

You can go to the home menu by pressing the **Menü** button from wherever you are. From the home menu, you can reach Live TV, the Program Guide, Recordings, Vodafone Select (VOD), Search, Settings and the Mailbox.

- Press the **Menü** button to go to Live TV.

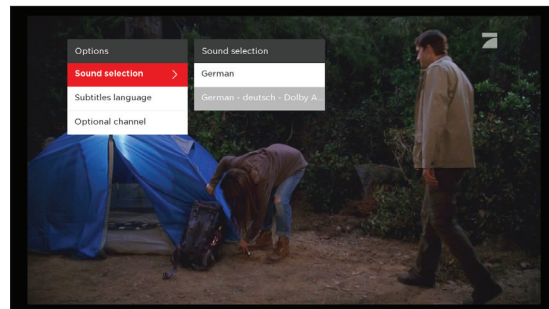

Watching Live TV

- Press the **P+/P-** button in order to change channels.
- You can also enter the channel number directly.
- Select a channel by pressing the **Programm** button and choose a channel from the **Program Guide**.

Setting Options

Press the **Opt** button while watching live TV to change the sound, subtitle language and optional channel.

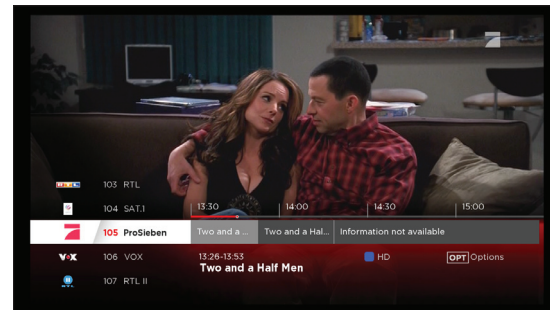

- **Sound selection:** Change the sound when the program supports multiple audio languages.
- **Subtitles language:** Activate subtitles or change the subtitle language if the program supports multiple subtitle languages.
- **Optional channel:** The available video subchannels will be listed. Select one of the subchannels when watching a channel that provides multiple video feeds.

Program Info Bar

You can change channels, see what's on later or set a recording.

- Press the **OK** button while watching live TV to display the program info bar.
- Press the **▲/▼** button to change channels.
- For SD events also available in HD, the **BLUE** button is displayed. Press the **BLUE** button in order to tune directly to the according HD channel.
- Press the **Exit** button to hide the program info bar.

Program Detail

The detailed information about the current program is displayed.

- **Watch:** Watch the current program
- **Watch in HD:** Watch the channel in HD if you have an activation for the selected channel.
- **Record:** Record the current program.
- **Record series:** Record all episodes of the series.
- **Add to favourites:** Add channels to favourites.

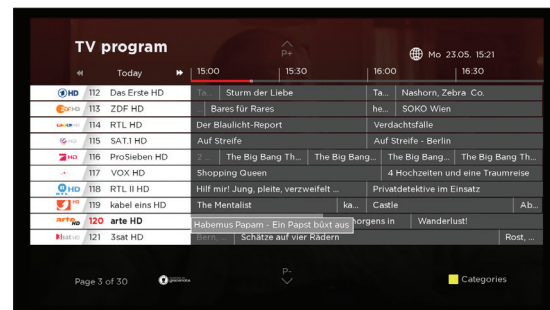

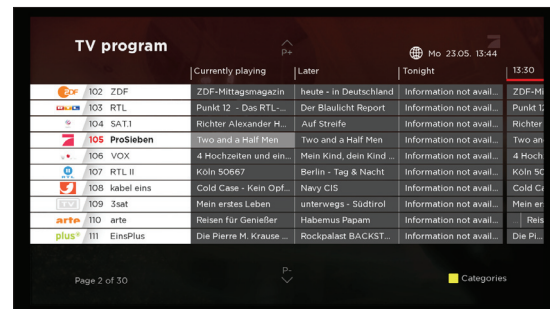

TV Program

The TV program is the on-screen version of your classic TV guide. It's where you'll find all the information concerning your favourite TV programs and channels in chronological order.

- In order to access the TV program you can either press the **Programm** button of your Remote or enter the Program section of the Menu.
At first you will be shown an overview of what is airing currently, next and at prime time. To enter the view with detailed starting times, you need to press the ►► button of your remote twice.

Navigation in TV Program

- Use the ▲/▼ button to navigate between channels.
- Use the ◀/▶ button to navigate between programs.
- Use the ◀◀/▶▶ button to view the programs one day earlier or later in the section with detailed starting times.
- Use the P+/P- button to change pages.
- By pressing the **YELLOW** button you can sort your channels by different categories like Favourite channels or alphabetically by choosing 'From A-Z'.

Watching a program

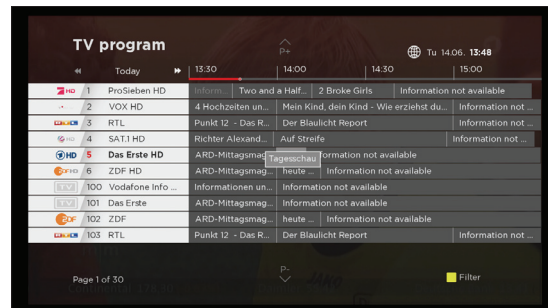

- Select a current program.
- Press the **OK** button to exit the TV Program screen and watch the program.

Scheduling a program

1. Select a future program. When pressing the **OK** button on a future event its program information will be displayed.
2. Select **Record** and press the **OK** button.
The scheduled program turns red and will be recorded.
You can also record a program without showing its detailed information by just hitting the **Rec** button when in the TV program.

Note:

- Select **Add to favourites** to add this channel to the favourites.
- If the program information is unavailable, you can schedule a recording for the program manually or by just hitting the **Rec** button when you're in the TV program.
- Refer to **Recording** for recording conflicts on page 16.

Pausing and Rewinding Live TV

When for some reason you have to interrupt watching, you can pause live TV and continue at the exact same point without missing a bit any time later. Just press pause and the program will be saved on the built-in hard drive for you to watch later.

To pause the program you are watching

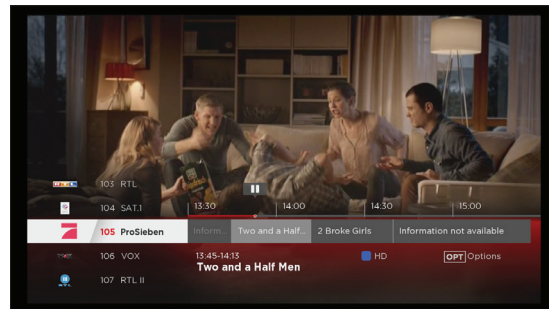

1. Press the **II ►** button while watching live TV to pause the program.
2. Press the **II ►** button again to play the program you paused from the point where you paused it. The pause function creates a time offset between the live broadcast and the playback for the user.
3. Press the **■** button to end the time-shifted playback and go back to the live program.

To rewind and watch missed scenes

1. In order to rewind the program you are currently watching press the **◀◀** button.
2. Press the **II ►** button at the point where you want to start watching. You can pause, rewind or fast forward within the program.
You can rewind up to the point when you tuned into the channel you are watching. If you reach this point while you are rewinding, the program is automatically paused.

Note:

- You can fast forward only when there is a time offset between the current watching point and the live broadcasting point caused by pause or fast rewind. You can fast forward up to the current broadcasting point.
- If you switch channel your current rewind opportunity gets lost and the device starts to record the currently watched channel.

Recording

You can watch a channel while recording other channels. You can record up to four channels at the same time (or three channels, respectively, when simultaneously watching another one).

Instant Recording

You can record the program you are watching instantly by pressing the **Rec** button. The recording will start at the current point of the broadcast. To stop recording press the **Rec** button again followed by the **OK** button.

Scheduled Recording

You can schedule a recording in the TV program or via the program info bar by just hitting the **Rec** button or you can

1. Select a future program and press the **OK** button.
2. Select **Record** then press the **OK** button.

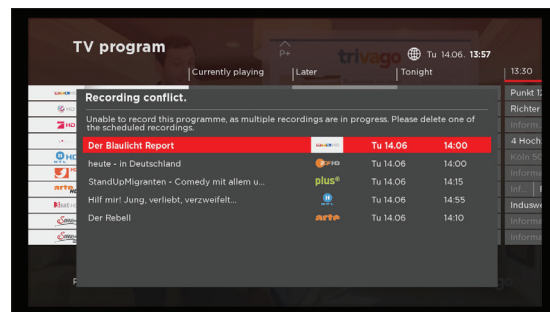

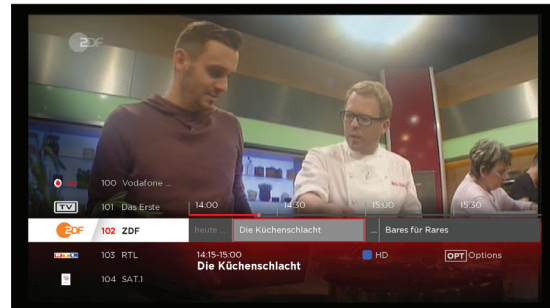

Also you can schedule a recording manually.

1. Press the **Menü** button.
2. Select **Recordings** and then **New recording**.
3. Enter the options for recording.

Recording Conflict

When a scheduled recording starts on a different channel while you are watching a channel and recording three other channels, a recording conflict occurs.

1. Select the program you wish to cancel, then press the **OK** button.
2. Press the **Zurück** button to cancel the recording.

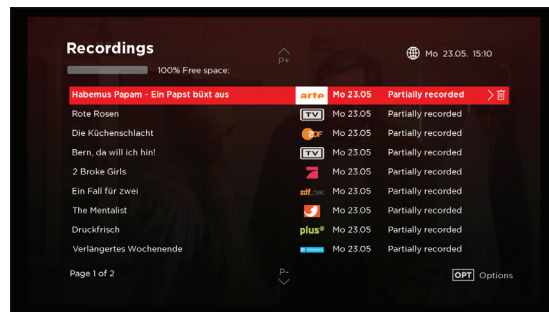

Managing Recordings

You can see the list of the scheduled, currently recording and recorded programs. Depending on whether you set the Disk Management to automatic or manual the free storage place is displayed differently.

If you set Manage Disk to automatic, the occupied space is only calculated by the recordings you already did. If you have set Manage Disk to manual however the occupied storage space is calculated by the recordings you already did and those that you have scheduled.

You can also manage the programs you recorded.

1. Press the **Menü** button.
2. Select **Recordings**.
3. Select one of your recorded programs and press **OK**.
4. Select an option.
 - **Play:** Plays the recording. Depending on the channel you recorded the program from you can start only from the beginning or from any desired point.
 - **Delete:** Deletes the recording.
 - **Lock recording:** Locks the recording from deletion when Manage Disk is set to Automatic. The recording can still be deleted manually.
 - **Organise:** You can create a folder, move the recording to the folder you want, and rename the recording using the keyboard.
5. Press the **OK** button.

Vodafone Select

Vodafone Select allows you to watch TV programs or movies over a network as part of an interactive broadcasting system (if already available in your region).

1. Press the **Menü** button.
2. Select **Vodafone Select**.

Vodafone Select not only consists of a large library of recent and classic movies that you can order or purchase, but also offers you a broad selection of TV station media centres where you can watch or rewatch almost everything they air.

Search

To use the search functionality it is necessary to connect your box to the internet. The results you will be shown consist of current TV programs, your recordings and titles you can find in our online video library Vodafone Select.

1. Press the **Menü** button.
2. Select **Search**.

By Title or Actor

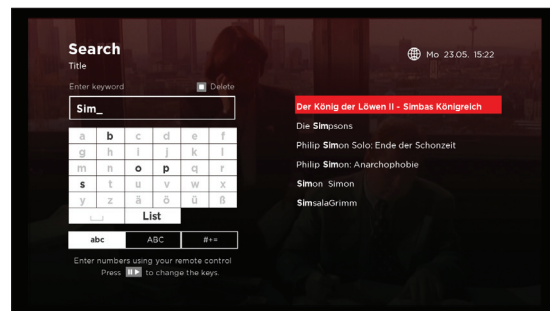

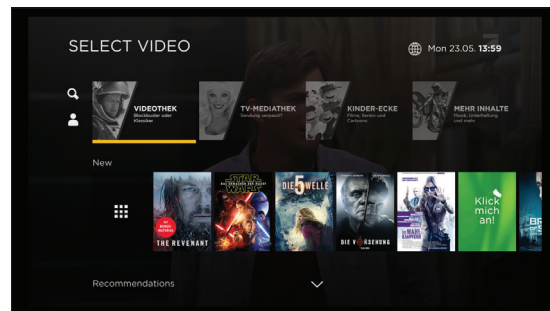

You can search for a program by entering a title or an actor's name.

1. Select **Title** or **Actor**.
2. Enter a keyword by using the arrow and **OK** buttons to navigate through the on-screen keyboard. When the title or actor you are searching for pops-up as a result in the list on the right select List and navigate to the desired result to select it with **OK**.

By Categories

You can search for a program by category.

1. Select **Categories**.
For some categories more input is needed. E.g. if you select Spielfilm as category, another list is displayed in which a subset should be selected, such as Action, Comedy, Krimi etc.
2. Press **OK** to view search results.

Settings

The settings are partitioned into Basic and All settings. 'Basic settings' consists of the most relevant settings, whereas All settings contains all general settings and special ones such as the Tutorial, Messaging, Service, System update and diagnosis.

Note: Press the **Exit** button to exit. Press the **Zurück** button to go to the previous menu.

1. Press the **Menü** button.
2. Select **Settings**.

Basic Settings

Internet setup

If you haven't already set up an internet connection when going through the first installation process or if you have to set up a new internet connection with another network. You can do it here. Make sure that you have either connected the Wi-Fi stick to one of the USB ports of your receiver or that there is a LAN cable connected to your receiver that connects it to a router.

Via LAN cable

1. Select **Internet setup**.
2. Select **Via LAN cable**.

Your digital receiver detects the internet connection and sets it up automatically.

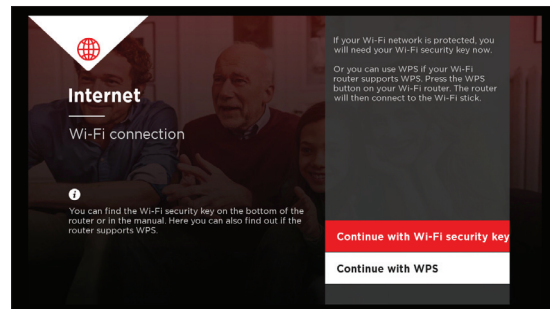

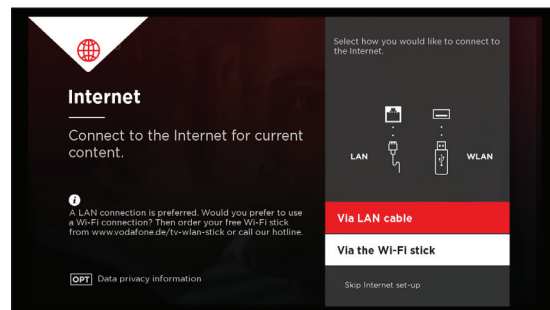

Via the Wi-Fi stick

1. Select **Internet setup**.
2. Select **Via the Wi-Fi stick**.

- **Continue with Wi-Fi security key:** Your digital receiver now searches for available networks. Select the wireless network you want. Enter your Wi-Fi security key. The message 'Your digital receiver is now connected to the Internet' is displayed.
- **Continue with WPS:** Your digital receiver detects the Internet connection and sets it up automatically.

Note:

- If you haven't set up another password, you can find the Wi-Fi security key on the bottom of the router or in its manual.
- You can use WPS if your Wi-Fi router supports WPS. Press the WPS button on your Wi-Fi router. The router will then connect to the Wi-Fi stick.
- Select **skip Internet set-up** to skip the Internet setup.

Settings

Energy settings

You can decide whether

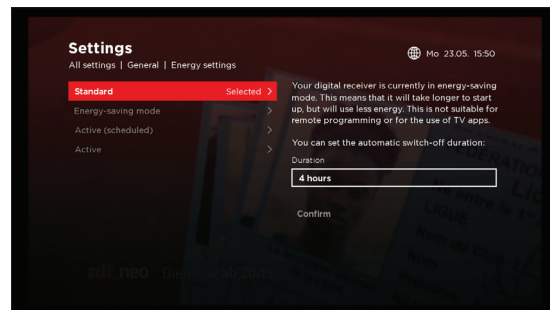

- Your receiver consumes less energy overall, but starts slowly, or
- Your receiver starts rapidly but has a higher overall energy consumption.

1. Select **Energy settings**.

2. Select an option.

- **Standard:** This mode helps you minimize your energy consumption. For this reason your digital receiver takes longer to start and switches off automatically if the remote control is not used. The duration until automatic switch-off can be determined.
- **Energy-saving mode:** In the Energy-saving mode your Digital Receiver consumes little energy on standby. In contrast to the standard mode the receiver does not switch off automatically.
- **Active (scheduled):** In the quick start mode you can set on which days, at what time and for how long your receiver automatically turns on from standby mode to active mode. The receiver switches to active mode for the duration you determined.
- **Active:** In the Active mode your digital receiver is always available and boots within seconds. In this mode the device has the highest power consumption.

3. Press the **OK** button to save your settings.

Settings

Manage

You can decide, if your receiver should automatically delete the recordings you have already viewed.

Add favourites

You can add channels to your favourite list easily.

Delete

You can delete channels from your favourite list.

Sort favourites

You can sort favourite channels by category or alphabetically.

Start channel search

Searches for all available channels and adds them into your line-up.

Tutorial

You can find helpful information about your digital receiver.

Message

You can receive the latest information from Vodafone Kabel Deutschland.

Declaration of consent

You will be asked to agree to receive marketing messages provided from Vodafone Kabel Deutschland.

Menu

You can set your menu as a start screen.

Change PIN

You can change your parental protection PIN into the four digits you can remember best. They however mustn't be four identical digits.

PIN VoD purchase

Before purchasing a VoD item you will be asked to enter your PIN in order to legitimate the purchase.

Change FSK-18-PIN

You can change your adult PIN into the four digits you can remember best. They however mustn't be four identical digits.

Data privacy

You can find the data privacy information.

Settings

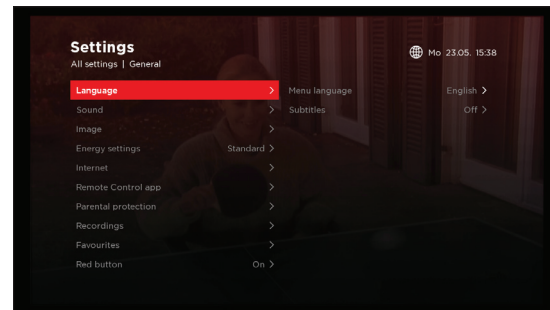

All Settings

General

Language

Allows you to set the on-screen and subtitle language.

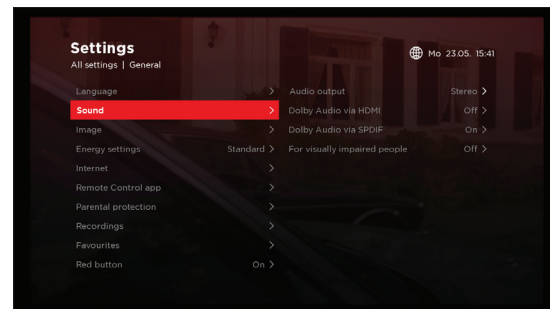

1. Select **All settings > General > Language**.
2. Select **Menu Language** or **Subtitles**.
3. Select the language you want.
4. Press the **OK** button.

Sound

Lets you choose the digital audio output mode.

1. Select **All settings > General > Sound**.
2. Select an option
 - **Audio output:** Select Mono or Stereo.
 - **Dolby Digital on HDMI/SPDIF:** Outputs Dolby Digital from HDMI/SPDIF if set to **On**. If set to **Off**, the audio output is in PCM.
 - **For visually impaired people:** This audio is supplemented with sounds that aid understanding the action on screen.
3. Press the **OK** button.

Settings

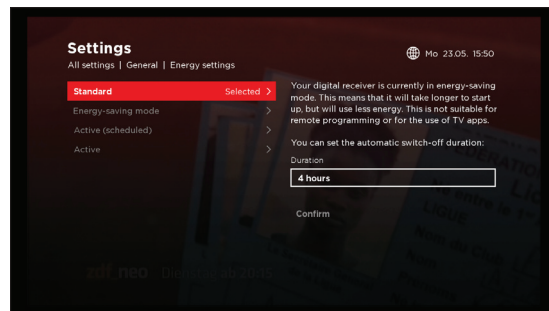

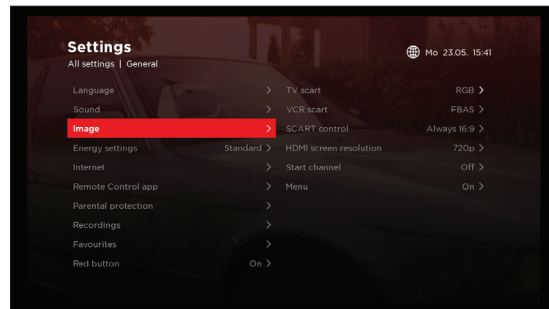

Image

Changes the way the image is brought to your screen.

1. Select **All settings > General > Image**.
2. Select an option.
 - **TV scart:** FBAS – RGB – S-Video
 - **VCR scart:** FBAS – S-Video
 - **SCART control:** Switch aspect ratio between 4:3 and 16:9 modes when the SCART cable is connected.
 - **HDMI screen resolution:** 576i - 576p - 720p - 1080i
 - **Start channel:** Tunes the default channel when powering on.
 - **Menu:** Set to start with the home screen or with live TV.

Energy Settings

1. Select **All settings > General > Energy Settings**.
2. Select an option.
 - **Standard:** This mode helps you minimize your energy consumption. For this reason your Digital Receiver takes longer to start and switches off automatically if the remote control is not used. The duration until automatic switch-off can be determined.
 - **Energy-saving mode:** Your Digital Receiver consumes little energy on standby. In contrast to the standard mode the receiver does not switch off automatically.
 - **Active (scheduled):** You can set on which days, at what time and for how long your receiver automatically turns on from standby mode to active mode. The receiver switches to active mode for the duration you determined.
 - **Active:** Your digital receiver is always available and boots within seconds. In this mode the device has the highest power consumption.

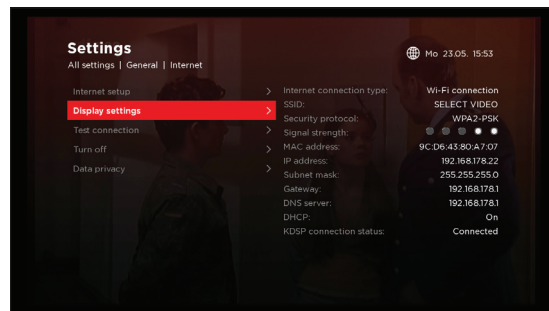

Settings

Internet

If you connect your receiver to the internet, additional offers from Vodafone Kabel Deutschland will be available to you. You can set-up an internet connection either through the wireless stick or via network (LAN) cable.

1. Select **All settings > General > Internet**.

- **Internet setup:** Sets up an internet connection via LAN cable or Wi-Fi stick.
- **Display settings:** View the Internet settings of your digital receiver.
- **Test connection:** Test your Internet connection.
- **Turn off:** Turn off the Internet connection.
- **Data privacy:** View the privacy information.

Remote control app

Select **All settings > General > Remote Control App**.

- **Link app:** Control your digital receiver using your remote control or smartphone. The app is available free of charge in the App store and Google Play store.
- **Delete linked apps:** Delete the linked app(s).

Settings

Parental protection

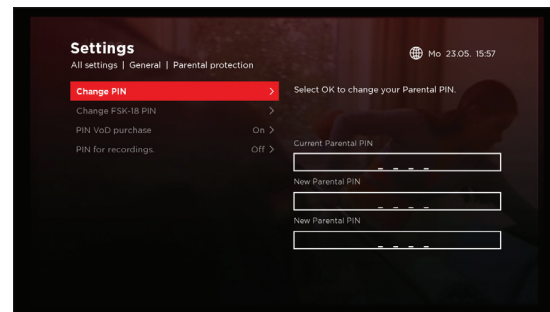

You have two different kinds of PIN codes that you can change here separately.

Select **All settings > General > Parental protection**.

- **Change PIN:** Change PIN.
- **Change FSK-18PIN:** Change the adult/FSK-18 PIN to prevent that your child gets access to adult content.
- **PIN VoD purchase:** Sets to enter your PIN when you purchase new VoD content.
- **PIN for recordings:** Sets the PIN for recordings to prevent your child from viewing the locked recordings.

Note:

- The default parental control PIN is in the letter that your Smartcard came in.
- If you have forgotten your PIN, contact your cable operator.
- If you enter your PIN wrong three times in a row you will be blocked from changing the PIN for 10 minutes.

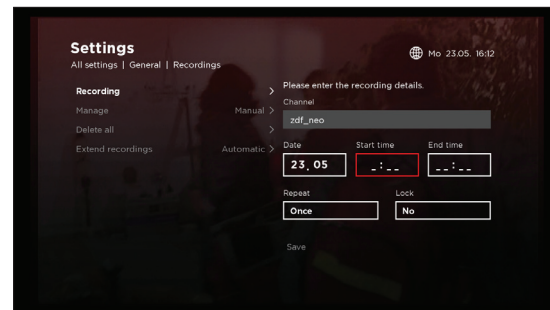

Recordings

You can schedule a recording manually at any time you desire.

1. Select **All settings > General > Recordings**.

- **Recording:** Enter the recording details.
- **Manage:** Set to delete the oldest recordings automatically when the disk space is full.
- **Delete all:** Deletes all recordings to free up disk space.
- **Extend recordings:** Adds time to the beginning and end of every recording in order to prevent missing scenes due to program changes.

Settings

Favourites

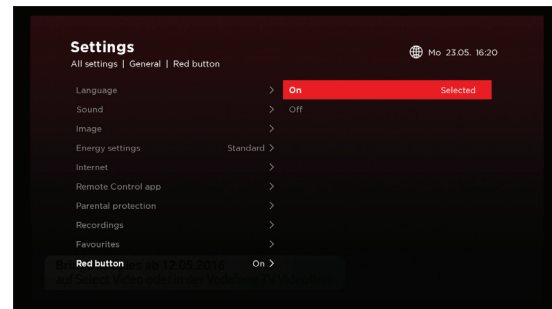

Select **All settings > General > Favouriteis**.

- **Add favourites:** Select the channel to add to the favourite list.
- **Delete:** Select the channel to delete from the favourite list.
- **Sort favourites:** Select the channel and press the **OK** button. Move the channel to the position you want and the press the **OK** button.

Red button

You can assign the shortcut to the VoD shop to the Red button on your remote control.

Settings

Tutorial

Find helpful information about your digital receiver.
Select **All settings** > **Tutorial**.

Message

If you have agreed to receiving marketing messages provided from Vodafone Kabel Deutschland in the Declaration of consent, here is one of the access points to them.
Select **All settings** > **Message**.

Mailbox

View the messages sent to you from Vodafone Kabel Deutschland.

Opt in

Give your consent to receiving messages from Vodafone Kabel Deutschland.

Service

View all contact information from Vodafone Kabel Deutschland.
Select **All settings** > **Service**.

Hotline

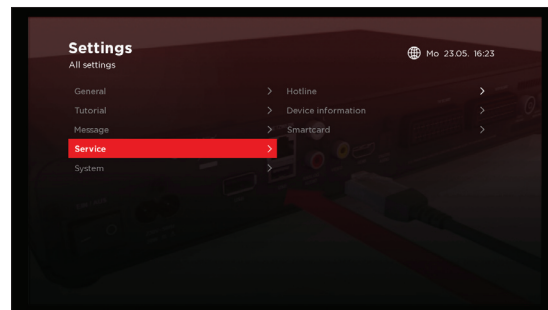

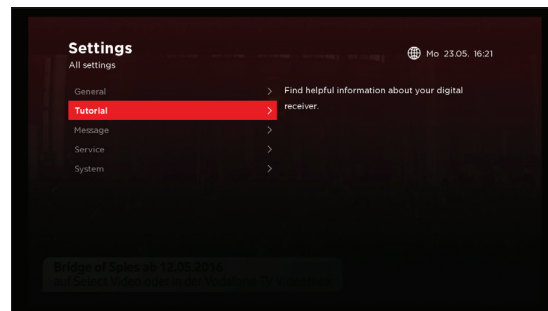

The number you can contact if you experience any kind of trouble with one of your Vodafone Kabel Deutschland devices or services.

Device information

All the information you need on your device, such as Manufacturer, Model Name, STB Serial No., Hardware and Software version and more.

Smartcard

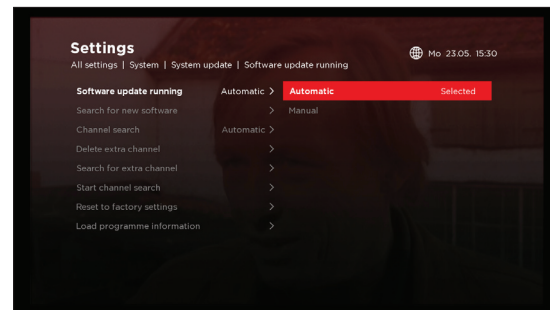

View all information on your smartcard (serial number, version, status, date of the last update of the program guide).

System update

All information on Software updates and searching additional channels.

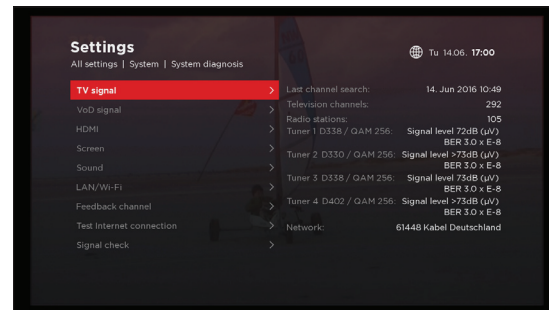

- **Software update running:** Set to update the software automatically or manually.
- **Search for new software:** If manual Software Update mode is selected and a new Software is found you can choose between **Install now**, **Install from standby** or **Install never**. If you choose automatic Software Update mode do not power off the receiver. If you refuse to download the new software, you may miss out on additional services.
- **Channel search:** Searches for available channels. You can choose to do this manually or set it on automatic.
- **Delete extra channel:** Delete the additional channels detected by frequency based scan.
- **Search for extra channel:** Search for additional channels which may not be found by the installation wizard.
- **Start channel search:** Search channels automatically.
- **Reset to factory settings:** When resetting your receiver to factory settings you can choose to either keep your recordings or delete them all.
Note that once you perform the factory reset, all user settings will be reset to the factory settings. After completing the factory reset, the installation wizard will appear automatically after a few seconds.
- **Load programme information:** Update the electronic program guide if necessary.

System diagnosis

See an overview of your system's status.

- **TV signal:** View the number of TV and radio channels scanned by the receiver and broadcast signal strength.
- **VoD signal:** View the signal strength on certain VOD frequencies.
- **HDMI:** View the currently configured HDMI resolution, HDCP status and information about the TV set connected through HDMI.
- **Screen:** View the name and number of the channel you are currently watching, the TV picture mode and the settings on TV and VCR SCART.
- **Sound:** View audio information such as On-screen language, Subtitle mode, Dolby Digital modes.
- **LAN/Wi-Fi:** View the current status of LAN/Wi-Fi settings.
- **Feedback channel:** View the availability status of DNS, ACS, VOD portal, VOD SRM servers, IP Connection.
- **Test Internet connection:** Test IP connection.
- **Signal check:** Check the signal.

Specification

Tuner & Channel	
Number of Tuners	4
RF input Connector	IEC 169-2, female (PAL)
RF loop through Connector	IEC 169-2, male (PAL)
Input frequency range	51 MHz to 862 MHz
Input Impedance	75 Ω unbalanced
Signal Level	-15 to +15 dB μ V @ 64, 128-QAM, -12 to +15 dB μ V @ 256-QAM
Modulation	QAM (DVB-C), Compliant to EN 300 429
Symbol rate	3 to 7 MHz
Constellation	16, 32, 64, 128, 256-QAM
Audio/Video Decoding	
Audio Decoding	MPEG I Layer 1,2,3, AAC, AAC+ Dolby Digital, Dolby Digital Plus
Audio Mode	Dual mono/Stereo/Joint stereo
Video Decoding	SD MPEG2, HD MPEG4 and SD MPEG4 (H.264/AVC)
Video Format	4:3, 16:9, Letterbox
Video Resolution	1080i, 720p, 576p, 576i
Memory	
Flash Memory	4MB NOR Flash + 256MB NAND Flash
RAM	320 MB
EEPROM	32 KB

Audio/Video In/Out	
Video	TV-SCART(CVBS,RGB), RCA(CVBS), HDMI
Audio	TV SCART, S/PDIF(Digital Audio Output), RCA(Audio L/R), HDMI
Hard Disk	
USB	USB 2.0 Host (5V  500mA Max.)
RJ-45	Ethernet 10/100Mbps
Power Supply	
Input Voltage	90-250V a.c., 50/60Hz
Type	SMPS
Power Consumption	Max. 35 W (Standby: Under 1 W)
Protection	Separate internal fuse. The input should be protected against lightning.
Physical Specification	
Size (w/h/d)	380 mm \times 55 mm \times 245 mm
Weight	2.8 kg

Service and Support

In the design of this product was taken great care to ensure the maximum quality possible. However in the rare event that you have any problems with the product and need advice or support you can be confident that we will do our best to help you. If you experience technical problems with the product you can call Vodafone Kabel Deutschland directly:

0800 / 52 666 25 (call free of charge from Germany)
Mon - Sun, 0:00 - 24:00

Trouble Shooting

Before contacting the customer service center, make sure to read the tips below carefully. If the problem persists after you complete the following procedure, please contact HUMAX customer service for further instructions.

General

Problem	What to Do
No light on the STANDBY button on the front panel	<ul style="list-style-type: none"> • Check the main power cable and make sure it is plugged into a suitable power outlet. • Check that the mains supply is switched on. • Connect the power cable to a different power outlet. • Check that the power switch is on at the rear of the product (where applicable).
No picture	<ul style="list-style-type: none"> • Check the main power cable and make sure it is plugged into a suitable power outlet. • Check that the mains supply is switched on. • Connect the power cable to a different power outlet. • Check that the power switch is on at the rear of the product (where applicable).
Poor picture	<ul style="list-style-type: none"> • Make sure there is no mobile phone or microwave oven near the product. • Keep the power and the RF cables apart from each other.
No or poor sound	<ul style="list-style-type: none"> • Check that your AV cable is connected correctly. • Check the volume levels of your TV set and the product. • Check if the product or TV is on mute. • Check audio type or soundtrack option (where applicable).
Remote control does not operate	<ul style="list-style-type: none"> • Check that your AV cable is connected correctly. • Check the volume levels of your TV set and the product. • Check if the product or TV is on mute. • Check audio type or soundtrack option (where applicable).
The product makes a humming noise	<ul style="list-style-type: none"> • The noise is from the fan; the hard disk is operating normally. This kind of noise is inevitable but seldom noticeable.

Channel

Problem	What to Do
Channel search does not work	<ul style="list-style-type: none"> Make sure that your cable is connected correctly.
Cannot watch scrambled channels	<ul style="list-style-type: none"> Check that you have the appropriate smartcard. Reinsert the smartcard and make sure it initialises correctly. Check in the Settings menu that the product is detecting the smartcard. Check in the Settings menu that you have a valid and working subscription to the channels you wish to view. Ensure that the smartcard is not damaged.
Cannot watch pay channels	<ul style="list-style-type: none"> Check in the Settings menu that you have a valid and working subscription to the channels you wish to view. Contact your network operator for more information.

Recording and playback

Problem	What to Do
Cannot schedule a recording	<ul style="list-style-type: none"> Check that no previous schedules are conflicting with the new schedule.
Cannot record programmes	<ul style="list-style-type: none"> The hard disk is full. Delete unnecessary programmes and make space for new recording. Check if recording conflicts with another channel. Stop the current recording or wait until the recording is finished. Check that the product is switched on when recording starts.
Cannot operate TSR (Time Shifted Recording)	<ul style="list-style-type: none"> TSR may not be available during recording. Wait until recording is finished. Delete unnecessary recordings and make space for new recording.
Cannot play back	<ul style="list-style-type: none"> To playback the recorded file of a scrambled channel, use the smartcard. In case it has been a long time since you last recorded, this may not work. Contact the cable operator. The signal during recording may be weak or the hard disk too full.
Cannot change channels while recording	<ul style="list-style-type: none"> Certain channels may not be changed due to restriction of the tuner or connection type.

Network

Problem	What to Do
Cannot connect to the Internet	<ul style="list-style-type: none">• Check if the network is connected correctly.• If wireless network is not available in your home, use a LAN cable to connect the product and the router.• Turn off the product and the router and then on to refresh the network.• Move the product closer to the wireless router or remove any obstacles from between them.• If you use a LAN cable, change a LAN cable.• Check the network security key.

Software update

Problem	What to Do
Cannot update new software	<ul style="list-style-type: none">• You can get an update. If you put the product into STANDBY mode over the night it will search for new software. Updates will be downloaded automatically. You can search for new software in the Settings area (Menü > Settings > General settings > System Update > Search for New Software). If the product does not find newer software, this means that no software update is available.

Setting Universal Remote Control

Set up the universal remote control so that you can control your TV with this universal remote control. The LED lights red when the TV mode is selected.

Programming the universal RCU

There are two ways to set up the universal remote control.

Brand Set Up

1. Press the hold **TV** and **Menu** buttons for 3 seconds. The LED blinks twice.
2. Enter the 4 digit code for the TV code set. Every time a number is entered, the LED blinks. When the fourth digit is entered, the LED blinks twice if the entered code is valid. If the code is invalid, the LED blinks 6 times and your digital receiver exits the set up mode. Repeat the previous steps.

Note: Press the **TV** and **0** simultaneously for 3 seconds to return to the default.

Auto Brand Search

The top brands have a Brand ID which has four digits with the most significant digit a 9. You do not have to enter the TV Code Set repeatedly when the code is invalid.

1. Press and hold the **TV** and **Program** buttons for 3 seconds. The LED blinks twice.
2. Enter the 4-digit code for Brand ID. Every time a number is entered, the LED blinks. When the fourth digit is entered, the LED blinks twice and remains on. It searches through all code-sets linked to the TV automatically.
3. Press the **STANDBY** button continuously. The LED turns off during transmission. Repeat until the TV turns off.

4. When the TV turns off, release the **STANDBY** button. Turn on the TV with the original TV remote control.
5. Press **TV** button for 3 seconds to confirm the code.

Querying the 4-digit code

You can find out the 4-digit code of the TV universal code that is active.

Pressing **1** and **Info** buttons will blink out the first digit of the TV code number; **2** and **Info** buttons will blink out the second digit, **3** and **Info** the third digit and **4** and **Info** buttons the fourth digit. No blinks indicate a zero.

Note: The TV universal code number blink-out will return the universal code number and not the brand number.

Volume unlock set up

To switch on Volume Unlock

Press and hold the **Exit** and **Mute** buttons simultaneously for at least 3 seconds. The LED blinks twice to indicate a successful set-up.

Once this volume unlock is set up, the TV volume buttons send TV volume codes and the receiver volume buttons send the receiver volume codes.

To return to volume punch-through to TV

Press and hold the **TV** and **Mute** buttons simultaneously for at least 3 seconds. The LED blinks twice to indicate a successful set-up.

If a new TV code is programmed, the volume buttons send TV volume codes – in other words the receiver volume buttons punch through to TV codes.

Resetting Universal Remote Control

Press and hold the **Menu**, **Text** and **STANDBY** buttons simultaneously for 3 seconds. The LED blinks twice.

After reset, the LED will blink two times again.

Open Source Software Notice

this, we have made it clear that any patent must be licensed for everyone's

interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel,

AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

copies of the library or if you modify it. For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide

Appendix

complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights. We protect your rights with the same terms. We make our code available to you under a license that gives you the same rights to copy, distribute and/or modify the library. To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone other than the original author, we need to make sure that the recipient of the original source, too, will know that what they have is the original source, so that the original author's reputation will not be affected by problems that might be introduced by others.

Second, we require that you make a constant reference to the existence of any free software program. We make our code available to you under a license that gives you a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library be made available to all those who have the library, so that their use will not be restricted by a patent holder.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary GNU General Public License. It is designed to make it easier to use free software by linking those libraries into non-free programs. When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking its combined work, a derivative of the original library. So, the GNU Lesser General Public License must apply to the combination if the entire combination is to be considered free. The Lesser General Public License permits more lax criteria for linking other code with the library. It does not require that the users of the library be given the right to protect the user's freedom than the ordinary General Public License. It also provides other free software developers less of an advantage over competing non-free programs. These disadvantages are the reason we use the GNU Lesser General Public License. We want to encourage the widespread use of a certain library, so that it becomes a de-facto standard. To achieve this, we would like to combine the liberty of some of our Free Software (the GNU Lesser General Public License) with the license practicalities of some of our proprietary programs (the GNU General Public License). In other words, we want to make it less of a barrier to linking with a library to make a program free software, so that a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C library in non-free programs enables many more people to use the whole GNU system, which is greatly enhanced when combined with a free system. Although the Lesser General Public License is less protective of the users' freedom, it does ensure that the user of a program that is linked with the library has the freedom and the wherewithal to run that program using the library.

Third, we require that all changes you make to the library be made available back to the wider community, so that the benefits of your work can be distributed and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library." The latter is only permitted to be distributed under the GNU Lesser General Public License, while the former must be completely under the library in order to run.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License.

The term "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of the library's functions and data) to form executables. The definition of "library" or any such software library or work which has been distributed under these terms: A work based on the Library means either the Library or any derivative work under copyright law; that is to say, a work containing the Library or a portion of it, with or without modifications, as long as they are made straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".) Source code for a work means the source code for the work, and the source code for a complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library. Activities other than copying, distribution and modification are not covered by this License. For distribution of its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library. Whether that is true depends on the nature and the extent of any modifications made to the library, and on what is written into it. Whether that is true depends on what the Library does and what

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library. You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such

modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the work and that you are holding the copyright under this License. In particular, you must retain the notice in each source file of the original library and its license notice to the extent practicable.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
4. **Libraries.** A library is a collection of machine-readable objects for performing calculations, or a collection of routines that can be used by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good effort to make sure that the library is a library and not an application. A function or table, the facility still operates, and performs whatever part of its purpose remains meaningful. [For example, a function in a library to compute square roots has a meaning that is independent of any particular application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application calls the function to compute square roots, it must pass an argument (perhaps a table) identifying which functions to use.]
- These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably separated from it and compiled and linked with it, you may consider these sections unmodified for purposes of these requirements, and you may, if and where appropriate, include special license terms for these sections. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it. If sections are written by a party other than the party who writes the library, you must indicate which sections are the unmodified library and which were written by you or written entirely by you; nevertheless, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library. In particular, when you combine the unmodified library with other work (with the Library or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this license to a given copy of the Library. To do this, you must alter all the notices that refer to this license, so that they refer to the ordinary GNU General Public License, version 2, instead of to this license. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices. Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy. This option is useful when you wish to copy part of the code of the Library into a

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange. If distribution of object code is made by offering access

to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License. However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a Library. The threshold for this to be true is not precisely defined by law. If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays

copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- A copy of the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above), and, if the work is a derivative work, a copy of the complete machine-readable "readable" work that uses the Library, as object code and/or source code, so that the user can modify the Library and then re-link to produce a modified version of the work. The user must be given the right to make such changes that changes the contents of definitions links in the Library will not necessarily be able to recompile the application to use the modified definitions.)
5. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the user's application, and (2) does not require the user to install the library. If the user installs one, as long as the modified version is interface-compatible with the version that the user was made with.
6. Accompanying materials must be provided for at least three years, to give the same user the materials specified in Subsection 6a above, for a charge no more than the cost of performing this distribution.
7. A distribution of the Library must be made from a designated place designated place, offer users access to copy the above specified materials from the same place.
8. Verify that the user has already received a copy of these materials or that they are not a duplicate copy.

For an executable, the required form of the "work that uses the library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this license.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations,

then is a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library. If any portion of this section is held invalid or unenforceable under any particular copyright law, it is to be limited to the minimum scope necessary to make this section valid and enforceable. No section is intended to apply, and no section is intended to apply in other circumstances. It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license

practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice. This section is intended to make thoroughly clear what is implied by the above: a contributor's acceptance of this license does not, by itself, indicate any intention of the contributor to make any other arrangement for distribution.

12 If the distribution and/or use of the Library is restricted in certain countries
13 either by patent or by copyrighted interfaces, the original copyright holder
14 who places the Library under this License may add an explicit geographical
15 distribution limitation excluding those countries, so that distribution is
16 permitted only in or among countries not thus excluded. In such case, this
17 license is limited to the countries so exempted. This provision does not
18 apply to the extent that the copyright holder is already exempted from
19 liability for copyright infringement by law.

13 The Lesser General Public License may be published revised and/or new versions
20 of the Lesser General Public License from time to time. Such new versions will
21 be similar in spirit to the present version, but may differ in detail to address
22 new problems.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs, you can copy and distribute the Library as part of those programs under the same license (the GNU General Public License) that you use for your programs, or under any other license approved by the Free Software Foundation. If you are unsure what license to use, please write to the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY
15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO

BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, IT MAKES NO WARRANTY FOR THE LIBRARY. TO THE EXTENT PERMITTED BY APPLICABLE LAW, EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER OR ANY OTHER PARTY WHO PROVIDES OR REPRODUCES THE CONTENT OF ANY MATERIALS BE LIABLE TO YOU OR TO ANY THIRD PARTY FOR ANY DAMAGES, INCLUDING INCIDENTAL OR CONSEQUENTIAL DAMAGES, ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR ANY THIRD PARTY OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the intent of the license. Each notice should include at least the "copyright" line and a pointer to where the full notice is found; one line to give the library's name and an idea of what it does >> Copyright (C) year name of author This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License or (at your option) any later version. You should have received a copy of the GNU Lesser General Public License along with this program; if not, write to the Free Software Foundation, Inc., 675 Mass Ave, Cambridge, MA 02139, USA. NO WARRANTY: without even the implied warranty of MERCHANTABILITY. THIS IS NOT A CONTRACT. FOR FULL DETAILS OF THE LICENSE, SEE THE LICENSE TEXT OR VISIT <http://www.gnu.org/licenses/lgpl.html>. IN ADDITION TO THESE TERMS, THERE MAY BE OTHER TERMS THAT APPLY TO YOUR USE OF THIS SOFTWARE. PLEASE CHECK THE README FILE AND/OR CONTACT THE AUTHOR FOR MORE INFORMATION. IF YOU MODIFY THIS SOFTWARE, PLEASE LET US KNOW BY E-MAIL. WE WOULD LOVE TO HEAR FROM YOU! THANKS! FOR FITNESS FOR A PARTICULAR PURPOSE. SEE THE GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA Also add information on how to contact you by electronic and paper mail. You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter

Yoyodyne, Inc., hereby disclaims all copyright interest in the library 'Frob' (a library for tweaking knobs) written by James Random Hacker.
